**ALDO COPPOLA**

Raw materials of vegetable origin and essential oils are blended together according to the original recipes of Aldo Coppola to produce a unique range of formulas with specific actions for specific needs, in the true spirit of officinal cosmetics in Italy.

*Authentically natural, genuinely effective.*

In the world of Aldo Coppola, essential oils form the basis of many professional scalp and hair treatment products. The principles of aromatherapy are applied in our laboratories to hair cosmetics, they provide inspiration for research and enhance the salon treatments carried out by our stylists.

The use of essential oils as an original therapeutic routine provides inspiration to Aldo Coppola, who uses them to create treatments rich in therapeutic and cosmetic virtues. The purifying, emollient and re-generating beneficial properties of these oils gives the hair volume, making it brighter and softer, more resistant to atmospheric agents, vibrant and beautiful.

We have created six different **ESSENTIAL BLENDS**, by combining the characteristics and properties of the oils in order to obtain products and treatments that are effective, safe and delicate, and pleasant to apply.
